Storm Water Contact Policy

It will no longer be acceptable practice to list a project's design engineer or architect as the Storm Water Contact in order to obtain a Grading Permit. The Storm Water Contact must be someone who is closely associated with the property owner, property developer, or contractor and must hold a current EPSC Level I or EPSC Level II Certification.

The EPSC level I or EPSC Level II certification will be verified using the TN EPSC website. The Storm Water Contact information form must be submitted at or before the pre-construction meeting. If an acceptable EPSC level I or EPSC Level II certified person is not listed as the Storm Water Contact by the pre-construction meeting, a Grading Permit will not be issued.

If the Storm Water Contact Person changes, the property owner, property developer, or contractor must submit the name and contact information of a new Storm Water Contact Person within 5 business days of the change. The person named must be EPSC level I or EPSC Level II certified. Failure to comply may result in a Stop Work Order being issued.

The person designated as the Storm Water Contact must fill out the Project Storm Water Contact Information Form, and is required to provide the following information:

- A business address
- An office phone number
- An email address
- A cell phone number
- A home phone number
- A home address
